AI & Automation AIGC, AI Coding, OpenClaw, Stable Diffusion, ControlNet, GPT-SoVITS, Python, pandas, openpyxl, xlswriter and OCR.

Internship Experience

Shanghai Metals Market Information & Technology Co., Ltd. (SMM)

Overseas Growth & Marketing Intern

Jan 2025 – Apr 2025

Shanghai, China

- Context:** Supported overseas user / customer lead operations, English outreach, media partnership exchange, sponsor maintenance and event growth review for international B2B conferences.
- Lead funnel:** Organized prospect, online-registration and attendee datasets; handled deduplication, categorization, field enrichment and lead prioritization for segmented outreach and sponsorship follow-up.
- Channel growth:** Supported multilingual marketing across TikTok, YouTube, Instagram and Facebook, reaching **100K+ overseas users** with around **25% engagement**; reviewed channel performance with registration and attendance data.
- Partnership conversion:** Supported **20+** media partnership exchanges and maintained **30+** overseas partners / sponsors, helping event attendance exceed **KPI by 24%**; supported lv1 business matching and lead tracking for **3,102** traceable attendees; used Python and Salesforce to add **200+** overseas company contacts.

Jinhongqiao Mall

CRM User Growth Analytics Intern

Oct 2025 – Nov 2025

Shanghai, China

- Context:** Supported membership operations and campaign review through member growth, year-end cumulative metrics, YoY / MoM reporting and coupon redemption analysis.
- Growth analytics:** Automated 2020–2025 member-growth, year-end cumulative, YoY and MoM reports with Python, pandas and xlswriter, replacing repeated manual pivot-table work.
- Campaign conversion:** Built an openpyxl workflow for white-collar voucher data, generating issued volume, redemption volume, redemption rate, share and selected voucher details for monthly campaign review.

ING Bank N.V. Shanghai Branch

Operations Support Intern, Payments / Clearing / Data Automation

Dec 2025 – Mar 2026

Shanghai, China

- Process support:** Worked in a controlled banking operations environment across transaction advice archiving, CNAPS / CFETS ticket monitoring, FX deal-slip matching, CNAPS Daily Recon, monthly statement checks and broadcast checks.
- Built a Python extraction workflow and documentation for Annual Account Review materials, converting OCR / Excel review sources into structured tables with reusable field mapping and SOP rules.

Projects and Honors

AI Product / Business Landing Pages and GTM Content

juyi.asia / dialflow.cn

2025 – Present

Independent Project

- Independently launched cross-border 3PL and AI outbound-calling scenario pages with AI Coding and OpenClaw, covering information architecture, page generation, copywriting and launch iteration for AI product websites, overseas acquisition pages and sales enablement materials.

AIGC Content Production Workflow

Qizhi Xuzhang: Automated Opening Sequence Generation

2024

University Project

- Integrated Stable Diffusion, ControlNet, SadTalker and GPT-SoVITS to produce 500+ opening clips; reduced per-piece production time from about 30 minutes to about 5 minutes, improving efficiency by about 83%; won Zhejiang First Prize and National Third Prize in the Chinese College Student Computer Design Competition.

Selected Honors: National Finals First Prize, Lanqiao Cup Visual Art Design; National First Prize, Global AI Algorithm Elite Competition; Provincial Bronze, Zhejiang Challenge Cup; National Third Prize / East China First Prize, National College Student Digital Media Technology Works Competition; Asia-Pacific Second Prize, Wuyue Cup Quantum Mathematical Modeling; Zhejiang Third Prize, Future Designer National College Art and Design Competition.

Profile

Hybrid background: Electronic Science and Technology plus a business-school exchange in Finland, connecting AI tools, data processing and commercial communication. **Growth practice:** Hands-on experience in overseas channel reach, lead cleaning, CRM review and campaign conversion analysis. **Delivery style:** Use Python, Salesforce, AIGC and AI Coding to produce growth assets, landing pages, operating reports and SOP workflows.
